**Light-Touch, Snap-Acting Control Valves**

Mead's LTV valves are compact 1/8" ported 4-way valves that may be actuated by hand, remote air signal, electric signal or mechanically by a machine element. They are ideal for powering small or medium sized cylinders and for piloting larger valves. Some models require as little as 4 ounces of force and .010" of plunger travel to actuate. See the chart on the opposite page for individual valve specifications.

**Micrometer Trip Position Adjustment Available On LTV-10, LTV-15 and LTV 20**

An optional screw adjustment on the valve lever allows the user precision control of the valve actuator. Specify LTV-10A, LTV-15A, or LTV-20A.

**DIN Solenoid Connectors**

Electrically actuated LTV valves utilize DIN type solenoids. DIN solenoids feature a totally encapsulated coil with 3 prongs, allowing fast and easy connections. DIN connectors are ordered separately. Mead offers 3 types of DIN connectors to facilitate connections to the solenoid. A full description of these connectors can be found on page 68.

**Basic Dimensions**

Note: Envelope dimensions of valves with actuators are shown in the chart on the right.

**LTV Valve Stacks**

Stacked valves reduce piping requirements by eliminating the need for a separate air supply to each valve. All LTV valves are stackable except LTV-75, 80, 85, 140, MH, TP, EH, FH & ES. When LTV-50, LTV-115DD or LTV-120DD valves are stacked 1/4" spacers are added between valves. To order, add "M" to the model number, specify number, type and position of valves.
